U.N. Regions Prior to 1966

The data regarding the regional membership of countries prior to Security Council expansion are documented in *The Procedure of the UN Security Council* by Loraine Slevers and Sam Daws. The screen shot provided in the raw data replication files was taken from <https://books.google.com> on May 6, 2015. The .csv file is based on this information.

For the 1946-1965 regions, we only assign a region if the country actually served on the Security Council.

Note: There were more irregularities during this time period, especially in the Eastern European and Asian groups. For example, some countries served on the Security Council for just one year; other countries took seats for regions of which they were not actually members. Liberia took the Western European Seat in 1961. Morocco, despite not being a member of the regional group, took the Middle Eastern seat in 1963-1964.

```

U.N. Regions from 1966 to the Present

We get modern information about the regional groupings from the U.N. website, "United Nations Regional Groups of Member States" <http://www.un.org/depts/DGACM/RegionalGroups.shtml>, accessed May 27, 2015.

Several special cases are described on this website:

Israel In May 2000, Israel became a Western Europe and Other States Group (WEOG) full member, on a temporary basis (subject to renewal), in WEOG's headquarters in the US, thereby enabling it to put forward candidates for election to various U.N. General Assembly bodies. In 2004 Israel obtained a permanent renewal for its membership.

Kiribati As of 2010, Kiribati (geographically in Oceania) is not a member of any regional group, despite other Oceania nations belonging to the Asian group. Despite its membership in the United Nations, Kiribati has never delegated a permanent representative to the UN.

Turkey Turkey, participates fully in both the Western Europe and Other States Group (WEOG) and the Asian Group, but for electoral purposes is considered a member of WEOG only.

United States of America The United States of America is not a member of any regional group, but attends meetings of the Western Europe and Other States Group (WEOG) as an observer and is considered to be a member of that group for electoral purposes.

Also, following the historical record, according to which region they have served for on the Security Council, I add Czechoslovakia, East Germany, and Yugoslavia to the list of Eastern European countries and West Germany to the Western European and Others Group (WEOG).
